

HAIS Family Guide to Private Schools

 '08

With the large number and variety of private schools in Hawai'i, you may find yourself asking, Just where do I start? Look no further than the following list. The 120 schools and 3 colleges in our chart are organized alphabetically by island, along with each school's contact information and other important data.

The guide was prepared by the Hawaii Association of Independent Schools (HAIS). All data was provided by the individual schools.

A little explanation as to some of the categories: We list a single contact name for each school. This is usually the admissions director. We wanted to give you a more personal place to start your search than just calling the school office. Most schools also have informative Web sites.

The tuition figure for each school is yearly tuition. It's sometimes given as a range. Usually the high end of the range is for older children and the low end for younger grades, but this varies. Preschools often charge by the month. In that case, we've noted it. Contact individual schools for more detail.

The "% Students Receiving Tuition Assistance" column tells you the percentage of students at a school receiving some type of financial aid. This will help you judge your chances for financial assistance.

The "Accreditation" column shows which organizations have accredited a school. For space reasons, see the list of acronyms on PSG13. Happy hunting!
